**NEW ZEALAND RACE HORSES WIN BIG USING ALL NATURAL SUPPLEMENTS -
PROVING THAT DRUG-FREE WINNING IS POSSIBLE**

***Created for people to maintain healthy joints and active lifestyles, Agel's FLX is taken
by Record Breaking Horse and Hundreds of Winning New Zealand Racers***

North Shore, New Zealand April, 2009 -- As the 2009 United States Triple Crown of Thoroughbred Racing kicks off with the Kentucky Derby on May 2 eyes are on reform measures in the North American horse racing industry. Just after last year's Triple Crown races, the United States Congressional Subcommittee on Commerce, Trade and Consumer Protection was asked by winning horse owners to support major reforms in the thoroughbred horse racing industry including a ban on steroids and all non-therapeutic drugs on race horses. New Zealand horse owners are finding that natural supplements found in Agel's FLX are proving to be the winning, even record breaking formula.

Changeover, a horse using Agel's FLX, smashed the New Zealand Trotting Cup World Record in September 2008. He led throughout to win the Spring Cup at Auckland beating Awesome Armbro, Gotta Go Cullen and Monkey King in a New Zealand Record time of 2:42.7 (mile rate 1:59) over the 2200 metres from a standing start. Awesome Armbro, in addition to 300 more winning horses in New Zealand, also uses FLX supplements. Over \$4 million (nz) in prize money has gone to FLX horses.

-more-

Agel created FLX to support healthy joints and maintain active lifestyles. As people are finding great results from its usage, Horse owners in New Zealand made the jump and saw results quickly. The four supplements found in FLX are Chondroitin Sulfate, Glucosamine, Methylsulfonylmethane (MSM), and Celadrin™. Chondroitin Sulfate is known to increase cartilage elasticity. Glucosamine is an amino sugar that is believed to assist in cartilage formation and repair and in the lubrication of the joints. Methylsulfonylmethane (MSM) is a biologically available form of sulfur shown to be effective at supporting joint health. And Celadrin™ is a proprietary combination of cetylated fatty acids that has been shown to promote joint health and reduce minor or temporary pain due to the normal activities of an active life. Although there are many supplements that contain one or even two of these supplements, Agel's FLX contains all four of these ingredients derived from natural sources. In addition, all Agel supplements are delivered in gel packs, making the delivery and ingestion easy and convenient.

Global Headquarters for Agel Enterprises are in Lehi, Utah in the western states of the United States.
